SUMMARY

Computer Science student building AI-powered and workflow-oriented systems across analytics, civic-tech, and intelligent platform applications. Experienced in developing structured, user-focused solutions involving LLM workflows, operational visibility systems, and data-driven platforms. Interested in AI applications, intelligent analytics, product systems, and scalable technology-driven decision support.

PROJECTS

SkinSoul

- Building an LLM-powered skincare intelligence platform focused on personalized analysis, contextual recommendations, and intelligent user interaction workflows.
- Currently training and refining AI models on Indian skin datasets to improve recommendation accuracy and contextual understanding across diverse skin profiles.
- Designing structured onboarding, recommendation, and analytical workflows focused on usability and scalable AI-assisted experiences.
- Exploring intelligent data interpretation systems and personalized user-focused AI interactions.

CivicPulse

- Developed a civic intelligence platform focused on structured issue reporting, operational visibility, and analytical tracking workflows.
- Designed systems for categorization, workflow management, and public information accessibility to improve coordination efficiency.
- Applied systems-thinking approaches to user interaction flows, structured reporting pipelines, and information clarity.

Urban OS

- Conceptualized a smart city operations platform integrating urban monitoring, infrastructure workflows, and centralized information systems.
- Mapped operational dependencies and multi-system coordination workflows across transportation, civic management, and urban services.
- Conducted structured analysis of user interactions, dashboard organization, and scalable workflow architecture.
- Focused on data-driven decision support, operational efficiency, and system-level process visibility.

MeshChain

- Explored decentralized workflow systems involving transparent coordination, structured interactions, and distributed operational architectures.
- Focused on system organization, secure interaction flows, and scalable coordination frameworks within Web3-oriented environments.
- Applied product-thinking and systems-design principles to bridge technical workflows with user-focused interaction systems.

ResQnet

- Designed an intelligent emergency coordination platform focused on operational visibility, resource prioritization, and real-time workflow management.
 - Structured analytical workflows for incident tracking, response coordination, and stakeholder communication under time-sensitive conditions.
 - Focused on scalable coordination systems and rapid-access information architectures.
-

EDUCATION

B.Tech in Computer Science (Cloud Computing) - 9.0

SRM Institute of Science and Technology, Delhi NCR

Senior Secondary (ISC) — 90.4%

Sophia Girls' School, Meerut

Secondary (ICSE) — 96.2%

Sophia Girls' School, Meerut

SKILLS

AI & Analytical Systems- LLM Application Development, AI Workflow Systems, Intelligent Recommendation Systems, Prompt Engineering, Data Interpretation, Structured Problem Solving, Systems Thinking, and Analytical Workflows

Product & Operations- Product Thinking, Agile & Scrum Fundamentals, Workflow Mapping, Requirement Gathering, User Story Writing, Product Documentation, Sprint Coordination, Stakeholder Communication, Cross-functional Collaboration, Process Optimization, Operational Coordination, Feature Prioritization, Roadmap Understanding, UAT Coordination, Structured Problem Solving, Execution Management, and Decision-support Systems Thinking

Technical- Python, HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, SQL, REST APIs, Git & GitHub, Responsive Web Development, Frontend System Design, API Integration, Web Application Architecture, and Blockchain & Web3 Fundamentals

Data & Analytics- Data Interpretation, Data Literacy, Dashboard Analysis, Analytical Thinking, Pattern Identification, Structured Data Workflows, Operational Analytics, Business Workflow Analysis, Insight-driven Problem Solving, and Information Architecture Thinking

ACHIEVEMENTS & CERTIFICATIONS

- **CISCE Recognition** for Excellence in Computer Applications (Score: 100)
- **Gold Medalist** — SOF English Olympiad & SOF Mathematics Olympiad
- **SnowPro Associate** Platform Certification
- Oracle OCI **Cloud Associate**
- Selected for Code in Place (Stanford's global Computer Science program) & Aspire Institute's Leaders Program
- Open Source Contributor at GirlScript Summer of Code (GSSoC'26) & Nexus Spring of Code'26
- Completed McKinsey Forward Program (problem-solving & structured thinking)
